

State of Tennessee – Department of Environment and Conservation  
Division of Water Pollution Control

## Request for Information

Local Governments subject to or potentially subject to the EPA Phase II storm water regulations

Please review the front and back of this sheet and revise it by marking through incorrect information and adding correct information. You may also find this document in Microsoft Word format on our web page, at <http://www.state.tn.us/environment/wpc/stormh2o/MS4.htm>. You can submit this form to us by e-mail at [storm.water@state.tn.us](mailto:storm.water@state.tn.us). Our mail address is **Permit Section/ L&C Annex, 6<sup>th</sup> Floor/ 401 Church Street/ Nashville, Tennessee 37243-1534**.

Permit Tracking No.: \_\_\_\_\_ (State Use Only)

MS4 Name: \_\_\_\_\_ (Name of town, city or county)

Operator Contact: \_\_\_\_\_  
(Give the name of the elected official representing the the local government.)

Mailing Address: \_\_\_\_\_

Operator contact E-mail address: \_\_\_\_\_

Program Contact Person: \_\_\_\_\_  
(Give name of person – e.g. deparment head, program manager – who will be primarily responsible for implementing the Phase II storm water program requirements.)

Phone Number: \_\_\_\_\_

Program contact E-mail address: \_\_\_\_\_

Mailing Address: \_\_\_\_\_

Technical or Other Contact Person: \_\_\_\_\_  
(Give name of person who will be most familiar with day-to-day activities of storm water quality management.)

Phone Number: \_\_\_\_\_

Program contact E-mail address: \_\_\_\_\_

Mailing Address: \_\_\_\_\_

The following table shows population and area data that we have on record. Please review the data and provide accurate, updated information if possible.

	<u>Data on record</u>	<u>Corrections</u>
Population, year 2000:	5999	
Area within city limits (Cities, towns)	5	
Unincorporated area (Counties)	--	
Population within unincorporated urbanized area (Counties)	--	

(See reverse side.)

## Local Governments Cooperating with Neighboring MS4 Programs

As a means to fulfill Phase II permit requirements, local governments/municipalities can work with neighboring municipal separate storm sewer systems (MS4s). We are interested in knowing if you expect to work with neighboring local governments in one of the following ways.

**a. Sharing resources with other local governments.** Two or more local governments can arrange to share personnel, equipment, costs, etc. on program elements. For instance, a city and county could agree to share costs of producing educational materials, while each municipality would distribute the information.

**b. Interlocal agreement with adjacent local government.** One local government can perform required activities for an adjacent local government. Such an agreement would involve legally binding interlocal agreements between local governments. For instance, a city could arrange with the county to have the county produce and distribute public education materials and conduct educational programs on behalf of the city. As another example, a county or an incorporated place located within an urbanized area such as the Memphis, Nashville, Knoxville, or Chattanooga urbanized areas may elect to contract with that city to carry out some or all program responsibilities.

**c. Area-wide MS4 program and permit application.** Several adjacent MS4s submit a joint permit application to the State, and a unified MS4 program for a region.

Please indicate below if you expect to work with other local governments on a Phase II program, and in what fashion: **a.** to share resources with neighboring MS4(s); **b.** to establish interlocal agreement with a neighboring local government in which the other municipality will perform a significant portion of storm water program activities for your MS4.; **c.** to submit combined permit application with one or more other regulated MS4s.

<u>List other local governments:</u>	<u>Nature of cooperation – a. b. c.</u>
